Summary

Backend-focused Software Engineer and 2026 AI & Data Science graduate with hands-on experience contributing to production Java/Spring Boot systems and building full-stack applications using PostgreSQL, TypeScript, Next.js, and NestJS. Experienced in REST API development, database-driven workflows, scheduled integrations, authentication, debugging, migrations, and CI/CD. Solved 350+ LeetCode problems with strong foundations in DSA, OOP, DBMS, Operating Systems, and Computer Networks.

Technical Skills

Backend: Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, NestJS, Node.js
Languages: Java, Python, TypeScript, JavaScript, SQL, C++
Databases: PostgreSQL, MySQL, MongoDB, TypeORM, Drizzle ORM, Flyway
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Engineering: API Design, Transactions, Validation, Authentication, RBAC, Scheduled Jobs, Database Modeling
Tools: Git, GitHub, GitLab, Docker, Postman, Maven, Swagger/OpenAPI, GitLab CI/CD

Professional Experience

Software Engineering Intern | Saptarishi Solutions **Dec 2025 – Present**
REX – Employee Expense, Receipt, Invoice & Event Management Platform

- Contributed production Java/Spring Boot backend features across receipts, invoices, corporate events, team events, and approval workflows using Spring Data JPA, Hibernate, PostgreSQL, and REST APIs.
- Implemented business rules for validation, workflow state transitions, ownership and delegated-access checks, persistence operations, and tenant-aware application behavior.
- Developed the initial HRLink-to-REX scheduled synchronization flow for processing employee records in batches and synchronizing beneficiaries, users, organizational data, and application roles.
- Refined synchronization handling with role validation, create-or-update processing, organization-data versioning, successful-record acknowledgements, logging, and failure handling.
- Worked with JPA repositories, native SQL, projections, Flyway migrations, transactional services, Postman, Swagger/OpenAPI, code reviews, QA issue resolution, Agile/Scrum, and GitLab CI/CD.

Projects

Luxora Estates – Full-Stack Real Estate Marketplace **Feb 2026 – Jun 2026**
Full-Stack Software Engineer, Team Project

- Built and contributed to a full-stack property marketplace using Next.js, NestJS, TypeScript, REST APIs, PostgreSQL, and TypeORM with buyer, builder, and administrator workflows.
- Developed a conversational property-search experience with natural-language constraint parsing, session-aware filters, parameterized PostgreSQL retrieval, preference ranking, and database-grounded responses with LLM-assisted interactions.
- Implemented and contributed to JWT/OAuth authentication, RBAC, property moderation workflows, structured pricing, subscription limits, administrative features, and payment-integration flows.

SCK – Wellness, Booking & Administration Platform **Jul 2026 – Present**
Full-Stack Developer, 3-Person Team

- Contributed to a Next.js, TypeScript, PostgreSQL, and Drizzle ORM platform supporting wellness offerings, user accounts, bookings, administration, campaigns, communication, and public content.
- Implemented SKY experience, responsive layouts, navigation, and UI improvements, and collaborated with teammates on booking workflows, integration, debugging, testing, and end-to-end feature completion.

Agentic AI Driven Intrusion Detection and Automated Response System **2026**
Final-Year Research Project | Presented at SCI-2026, Swinburne Vietnam

- Developed and evaluated dual-output deep-learning models for binary intrusion detection and multiclass attack classification on UNSW-NB15, comparing MLP, CNN, GRU, and LSTM architectures.
- Applied mutual-information feature selection and an agentic decision engine that combines prediction confidence and risk signals to produce ALLOW, MONITOR, or BLOCK responses; MLP achieved 96.6% post-selection binary accuracy.

Education

Bachelor of Technology in Artificial Intelligence & Data Science | SRKR Engineering College Jun 2022 – Jun 2026

CGPA: 8.45/10 | Relevant Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Coding Practice & Leadership

- LeetCode:** Solved 350+ problems across arrays, strings, trees, graphs, recursion, backtracking, dynamic programming, greedy algorithms, and binary search.
- Vice Chair, Computer Society of India:** Organized workshops for 200+ students, led 15 volunteers, and coordinated a DevOps Hackathon with 150+ participants.
- Master Orator Semi-finalist, Toastmasters International:** Recognized for structured communication, presentation, and public-speaking skills.
